

## COLD HEADING QUALITY (CHQ) STAINLESS STEEL WIRE

Cold Heading Quality (CHQ) Stainless Steel wire is supplied in a wide range of grades and diameters for the optimisation of your manufacturing process.

- Strict control of chemical property in accordance with the final application.
- Uniform quality through continuous heat treatment processing.
- Excellent surface condition by accurate dimension control system.
- Stable and uniform coating through in-line processing.
- Newly developed E-Co coating gives higher cold headability and longer tool life.
- E-Co is especially successful in the manufacture of components requiring to be bent after the heading process.

### Specifications

Applications	Grade	Diameter	Surface	Standards	Tensile Strength	Packing
Screw	304CU, XM7	0.80 – 34.00 mm	S-CO DULL S-CO BRIGHT E-CO	ASTM A 493 JIS G 4315 KS D 3697	WSA WSB	12", 16", 20", 24", 32", 42" COILS 16", 20", 24" Carriers
Rivet	304HC, 310S					
Nail	304, 304L, 304J3					
Anchor Bolt	316, 316L, 410					
Heat Resisting Bolt Tapping Screw	430, 434A
